

DUAL BATTERY SYSTEM – UNDER BONNET UTILISING ISOLATOR

Recommendations: 16mm² Cable for Battery to Battery cables and Anderson plugs, Lugs or Battery terminals for second battery, suitably sized circuit protection including Circuit Breakers (50 – 80Amp) & Fuses, secure cables with Sikaflex or Silicon adhesive at spot points to prevent vibration rub, ensure battery is well secured in a tray, solder all connections, Insulate exposed cables. Mount Isolator high in engine bay and ensure you earth the isolator as per instructions.
